WHAT: Bendix (Bendix Commercial Vehicle Systems LLC) will hold **in-depth technical training sessions in California, Colorado, Illinois, and Minnesota.**

The **Bendix Air Brake Training** class covers the description, operation, and service elements for the total range of components found within dual air brake systems. Topics include fundamentals of compressed air, tactics for air system failure mode diagnosis and troubleshooting, and air brake system and foundation brake components (air compressors, valves, foundation drum brakes, and air disc brakes).

Air Brake Training classes include classroom lectures and practical hands-on exercises, plus visual aids to demonstrate the components and related systems. Most locations feature operational demonstration boards.

All registrants may elect to take part in a written test administered at the close of each class. Bendix will grade the exam, and registrants earning a passing grade will receive a Tested and Passed Certificate. Those who take the exam and don't pass will receive a Certificate of Completion, as will registrants who elect not to participate in the optional testing. In-person Bendix training and the optional test are not affiliated with the U.S. Department of Transportation (DOT), and this does not take the place of any instruction or certification exam administered by the DOT.

WHEN AND WHERE:

June 20-22: San Marcos, California – Palomar College, 1140 W. Mission Road

June 27-29: Mattoon, Illinois – Lake Land College, 5001 Lake Land Boulevard

July 18-20: Moorhead, Minnesota – Minnesota State Community and Technical College, 1900 28th Avenue South

July 25-27: Thornton, Colorado – Adams 12 Five Star School, 1350 E. 126th Avenue

Class size for the 2023 in-person Bendix training courses is limited, and enrollment is on a first-come, first-served basis. For a full listing of locations and dates, visit [bendix.com](https://www.bendix.com).

COST: The cost for the training class, per attendee, is \$475 (U.S.).

HOW TO REGISTER:
