WHAT: Bendix Commercial Vehicle Systems LLC (Bendix) will hold **in-depth technical training sessions in Arizona, Kentucky, Ohio, and Oklahoma, as well as a virtual class.**

The three-day **Air Brake Training** class covers the description, operation, and service elements for the total range of components found within dual air brake systems. Topics include fundamentals of compressed air, tactics for air system failure mode diagnosis and troubleshooting, and air brake system and foundation brake components (air compressors, valves, foundation drum brakes, and air disc brakes). The class also provides an introduction to the Bendix® GSBC® (Global Scalable Brake Control) electronic braking system technology, as well as Bendix® GSAT® (Global Scalable Air Treatment).

The two-day **Advanced Technology Training*** class picks up where the Air Brake Training course ends, covering the operation and troubleshooting of higher-level driver assistance and safety systems, as well as diagnostic software. In addition, the session includes in-depth, hands-on maintenance for Bendix® air disc brakes and electrical diagnostics. Systems addressed in the course include:

- Antilock Braking Systems (ABS)
- AutoVue® Lane Departure Warning (LDW) System from Bendix CVS
- Bendix® ESP® Electronic Stability Program full-stability technology
- Bendix® Wingman® Advanced™ – A Collision Mitigation Technology
- Bendix® Fusion™, Bendix's flagship driver assistance system family
- SmarTire® and SmarTire® Trailer-Link™ Tire Pressure Monitoring Systems (TPMS) by Bendix CVS
- Bendix GSBC electronic braking system and Bendix GSAT

All registrants in the three-day Air Brake Training and two-day Advanced Technology Training courses may elect to take part in a written test administered at the close of each class. Bendix will grade the exam, and registrants earning a passing grade will receive a Tested and Passed Certificate. Those who take the exam and don't pass will receive a Certificate of Completion, as will registrants who elect not to participate in the optional testing. In-person Bendix training and the optional test are not affiliated with the U.S. Department of Transportation (DOT), and this coursework

does not take the place of any instruction or certification exam administered by the DOT. Bendix does not certify technicians for work on its systems.

** Due to the quantity and complexity of the products covered, Bendix highly recommends that each student complete the Bendix Air Brake Training (three-day) class, or at minimum the online brake school at brake-school.com, before taking the Advanced Technology Training class. Both classes include classroom lectures and practical hands-on exercises, plus visual aids to demonstrate the components and related systems. Most locations feature operational demonstration boards.*

WHEN AND WHERE:

Air Brake Training

September 15-17: Avon, Ohio – Bendix CVS Headquarters, 35500 Chester Road

October 6-8: Tolleson, Arizona – Arizona Trucking Association, 7500 West Madison Street

October 6-8: Bowling Green, Kentucky – Bendix CVS, Bowling Green Manufacturing Facility, 346 Central Avenue

October 20-22: Oklahoma City, Oklahoma – Francis Tuttle Technology Center, Reno Campus, 7301 West Reno Avenue

November 10-12: Virtual Class – Online only, 8 a.m.-4 p.m. Mountain Time

Advanced Technology Training

September 29-30: Avon, Ohio – Bendix CVS Headquarters, 35500 Chester Road

Class size for the 2026 in-person Bendix training courses is limited, and enrollment is on a first-come, first-served basis. For a full listing of locations and dates, visit bendix.com. The schedule is subject to change.

COST: The cost for each training class, per attendee, is \$525 (U.S.) for Air Brake Training; \$475 (U.S.) for Advanced Technology Training; and \$425 (U.S.) for the virtual class.

HOW TO REGISTER:

Register online at bendix.com or B2Bendix.com. For more information, call 1-800-AIR-BRAKE (1-800-247-2725).

About Bendix Commercial Vehicle Systems LLC

Bendix Commercial Vehicle Systems, a member of Knorr-Bremse, develops and supplies leading-edge active safety technologies, energy management solutions, and air brake charging and control systems and components under the Bendix® brand name for medium- and heavy-duty trucks, tractors, trailers, buses, and other commercial vehicles throughout North America. An industry pioneer, Bendix is driven to deliver the best solutions for improved vehicle safety, performance, and overall operating cost. Contact us at 1-800-AIR-BRAKE (1-800-247-2725) in the U.S. or 1-800-461-1019 in Mexico, or visit bendix.com. Log on and learn from the Bendix experts at brake-school.com. And to learn more about career opportunities at Bendix, visit careers.knorr-bremse.com/.
