2022 Bendix Training Classes

To address market demand, Bendix is expanding the availability of its **Bendix Advanced Technology Training** (2-day) class which launched in 2019. This highly attended course rounds out the Bendix training schedule which also includes the tried-and-true **Bendix Air Brake Training** (3-day) class.

Air Brake Training Classes

The Air Brake Training class is tailored to new & experienced technicians.

Curriculum includes the fundamentals of compressed air; tactics for air system failure mode diagnosis and troubleshooting; and air brake system and foundation brake components, including air compressors, valves, foundation drum brakes, air disc brakes, plus steering. This all-inclusive course incorporates description, operation, troubleshooting, and service elements for the total range of components within dual air brake systems. **Note that depending on the student's technical knowledge, Bendix recommends that each participant complete the online air brake training on brake-school.com before taking our in-person Air Brake Training (3-day class)*.**

Advanced Technology Training Classes

The Advanced Technology Training class picks up where the Air Brake Training ends*.

This class covers the operation and troubleshooting of advanced safety systems and software. Topics include Antilock Braking Systems (ABS), the Bendix® ESP® full stability system, Bendix® Wingman® Advanced™ – a Collision Mitigation technology, AutoVue® – lane departure warning system, SafetyDirect® – a web-based vehicle monitoring system, our flagship Bendix® Wingman® Fusion™ driver assistance system family, the SmarTire® and SmarTire Trailer-Link™ Tire Pressure Monitoring Systems (TPMS), Active Steering by Bendix, and more. Class time includes in-depth, hands-on maintenance for Bendix® air disc brakes and electrical diagnostics. **The increase in technological advances in braking and stability makes this a training must for the advanced technician.**

*Due to the quantity and complexity of the products covered, Bendix **highly recommends** that each student complete the Bendix Air Brake Training (3-day) class, or at minimum, the online brake school at brake-school.com, **before** taking the Advanced Technology Training class. Classes include classroom lectures and/or practical hands-on exercises, plus visual aids to demonstrate the components and related systems. All locations feature operational demonstration boards.

NEW IN 2022... All registrants in the three-day Bendix Air Brake Training and two-day Bendix Advanced Technology Training school may elect to take part in an optional written test administered by Bendix at the close of each class. Bendix will grade the exam, and the registrant will receive a **Tested and Passed Certificate** to indicate they were tested on the presented material and received a passing grade. Registrants who elect to take the test and do not successfully pass the exam will receive a **Certificate of Completion**. Registrants who elect not to participate in the optional testing will receive a Certificate of Completion.

Receipt of either certificate is a measure of knowledge on materials delivered by Bendix Commercial Vehicle Systems LLC (Bendix). **In-person Bendix training and the optional test are not affiliated with the U.S. Department of Transportation (DOT). It does not take the place of any instruction or Certification exam administered by the DOT.**

2022 Bendix Training Schedule

State	City	Date <i>All Training Classes are 8:00 a.m. to 4:00 p.m.</i>	Class Code	
Air Brake Training (3-Day) Tuesday – Thursday
