

BENDIX[®] UPGRADE PROGRAM

ADD BENDIX[®] ADVANCED SAFETY SYSTEMS
TO YOUR IN-SERVICE VEHICLES

Bendix

ENHANCE YOUR FLEET'S SAFETY PROGRAM WITH BENDIX® UPGRADES

Today, more and more fleets recognize the benefits of Bendix safety systems to help mitigate accidents and support driver coaching through video and data. They want to keep their vehicles current with the most advanced—and rapidly evolving—driver assistance technologies available.

Now, you can upgrade your existing vehicles* through the Bendix Upgrade Program.

Upgrades* including Bendix® Wingman® Fusion™ driver assistance systems, Bendix® BlindSpotter® side object warning system, SafetyDirect® by Bendix CVS, and more are available for a wide range of vehicles built after 2010 not originally equipped with these systems.

Safety technologies available with the Bendix Upgrade Program*

- **Bendix® Wingman® Fusion™** – collision mitigation system integrating radar, camera, and braking inputs for model year 2016+ trucks and tractors with Bendix® ESP® Electronic Stability Program full-stability system
 - Fusion upgrades include enhanced Multi-lane Automatic Emergency Braking (AEB) and enhanced Stationary Vehicle Braking (SVB)
- **Bendix® Wingman® Advanced™** – collision mitigation technology (radar only) for model year 2010+ with Bendix® ESP
- **Bendix® AutoVue®** – lane departure warning system
- **Bendix® BlindSpotter®** – side object warning system
- **SafetyDirect® by Bendix CVS** – video and data event recording with fleet management and visibility tools
- **Bendix® VORAD® VS-500** – collision warning system updated with the latest radar technology for 2010 or newer trucks and tractors without Bendix® ESP® full-stability program

* Contingent on vehicle compatibility.

Talk to your Bendix Authorized Upgrade Center (see back panel for contact information) or call 1-800-AIR-BRAKE (1-800-247-2725) to be directed to an AUC.

Visit bendixcvsupgrade.com to discover the upgrades available for your truck or tractor.

Start with Bendix® Authorized Upgrade Centers

Bendix upgrades are only available from a Bendix® Authorized Upgrade Center (AUC). These experienced and specially-trained Upgrade Centers will assist you through the entire upgrade process: availability, vehicle compatibility, timing, installation, and pricing.

Field installation of Bendix® safety systems must be performed by Bendix-certified technicians. Only Bendix-certified Upgrade Technicians possess the required knowledge and training and have access to the specialized tools and techniques required to professionally install Bendix advanced safety systems and get your vehicles back on the road and productive as quickly as possible.

Bendix Authorized Upgrade Centers also provide support after the upgrade is complete with driver and technician training materials, VIN registration with Bendix, and access to our full complement of technical support resources and tools.

Bendix quality upgrades for your fleet

Bendix® safety system upgrades adhere to the same high-quality standards you expect from Bendix. Each upgrade is engineered for your vehicle's specific make, model, and year to ensure proper fit and function and can be only be obtained from a Bendix Authorized Upgrade Center.

Bendix upgrades include: major components, overlay harnessing, connectors, special brackets, and displays needed to complete the work with minimum vehicle downtime. Most upgrades can be completed in 4 hours or less. The upgrade is much more than simply parts, it also includes the installation process, installation verification, tools, and the expertise of Certified Upgrade Technicians.

Although the upgrade systems may look visually different when compared to factory systems, their performance is similar to an OE-installed system. System alerts and functionality will be the same, so when your driver gets behind the wheel, he or she will know what to expect from Bendix safety systems in terms of visual and audible alerts.

Bendix Upgrades are covered by warranty. Talk to your Bendix Authorized Upgrade Center for complete warranty details.

Visit bendixcvsupgrade.com to find a list of Bendix safety systems available on your vehicle.

START YOUR JOURNEY TO ENHANCED VEHICLE SAFETY

Identify the trucks or tractors in your fleet you want to upgrade.

Contact your Bendix® Authorized Upgrade Center (AUC) or visit bendixcvsupgrade.com to locate an AUC and determine potential upgrades for your vehicle(s).

AUC provides details on upgrade timing and pricing, and addresses any other questions.

Place your order and schedule upgrades with your Bendix AUC.

Make your vehicles available for Certified Upgrade Technicians to complete the upgrade installation.

Upgraded vehicles are now ready for driver and technician orientation and return to operation.

Bendix safety technologies complement safe driving practices and are not intended to enable or encourage aggressive driving. No commercial vehicle safety technology replaces a skilled, alert driver exercising safe driving techniques and proactive, comprehensive driver training. Responsibility for the safe operation of the vehicle remains with the driver at all times.
