FOR IMMEDIATE RELEASE

BENDIX® INTELLIPARK® ELECTRONIC PARKING BRAKE SYSTEM
NOW AVAILABLE ON KENWORTH TRUCKS

*Safety Technology Helps Prevent Rollaways and Offers Additional Driver Benefits,
Including Easy-to-Operate Switches and Status LEDs*

AVON, Ohio – Dec. 10, 2025 – The Bendix® Intellipark® Electronic Parking Brake (EPB) System from Bendix Commercial Vehicle Systems LLC (Bendix) is now available as a factory-installed option on Kenworth heavy- and medium-duty models.

The Bendix Electronic Parking Brake system comes equipped with advanced safety features such as Rollaway Mitigation, Smart Unpark™, and Auto Trailer Brake Release (on towing models). The Intellipark system's rollaway mitigation capability may automatically engage the parking brakes if the system determines an unintentional rollaway is about to occur. Intellipark's features are supported by unique interlocks that verify the vehicle is ready to be parked or unparked through sensors that monitor door position, seat belt status, and vehicle movement.

Bendix's Intellipark system replaces the traditional red and yellow push-pull knobs with easy-to-engage electronic switches, making it more ergonomically friendly and eliminating the "stinging" feel typically associated with manual dash valves – while helping to reduce fatigue and distraction during frequent stops. The switches maintain the familiar colors, symbols, and text and include built-in LEDs that clearly show brake status at a glance.

"It's a point of pride to work alongside the team at Kenworth to make available advanced technologies and the best tools for North America's fleets and drivers," said Nicole Oreskovic, Bendix vice president, sales and marketing. "Having Kenworth equip their trucks with Bendix's

latest technologies such as Bendix Intellipark not only reflects a strong relationship that goes back decades but shines a spotlight on our shared focus on helping make roads safer – today and in the future.”

Bendix emphasizes that, like all advanced technologies, the Bendix® Intellipark® Electronic Parking Brake System is designed to complement safe driving practices. No commercial vehicle safety technology, including Bendix safety technologies, replaces a skilled, alert driver exercising safe driving techniques and proactive, comprehensive driver training. Responsibility for the safe operation of the vehicle remains with the driver at all times. Never wait for the system to intervene. Every driver should carefully review the operator’s manual and be trained by the fleet or vehicle owner on the proper operation and limitations of advanced technologies during operation.

“We’re driven to create the best solutions, and we believe Intellipark – part of our suite of advanced driver assistance products – solidly delivers on that commitment,” said Oreskovic. “With Intellipark, we aim to make a driver’s job safer and easier behind the wheel and offer additional peace of mind to them and their fleet managers.”

About Bendix Commercial Vehicle Systems LLC

Bendix Commercial Vehicle Systems, a member of Knorr-Bremse, develops and supplies leading-edge active safety technologies, energy management solutions, and air brake charging and control systems and components under the Bendix® brand name for medium- and heavy-duty trucks, tractors, trailers, buses, and other commercial vehicles throughout North America. An industry pioneer, employing more than 3,600 people, Bendix is driven to deliver the best solutions for improved vehicle safety, performance, and overall operating cost.
