

# The Results Are In ... And The Numbers Speak For Themselves.

In comprehensive testing conducted by Bendix Commercial Vehicle Systems LLC, our engineers compared the performance of the new Bendix® SRC-7000™ spring brake valve to valves available in the market today. The test evaluated overall durability and valve element breakdown.

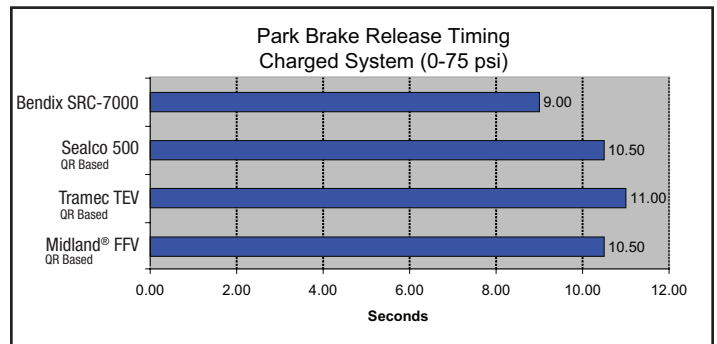

Bendix® SRC-7000™ Spring Brake Valve

OE part number K025776  
Service part number K025778

Spring Brake Valves Tested	Durability Test Room Temperature (up to 500K cycles)
<span style="color: green;">✓</span> Pass <span style="color: red;">✗</span> Fail	
<b>Bendix® SRC-7000™</b> <i>A new, low-cost option</i>	500K <span style="color: green; font-size: 2em;">✓</span>
Sealco® 500	142K <span style="color: red; font-size: 2em;">✗</span>
Tramec® TEV	262K <span style="color: red; font-size: 2em;">✗</span>

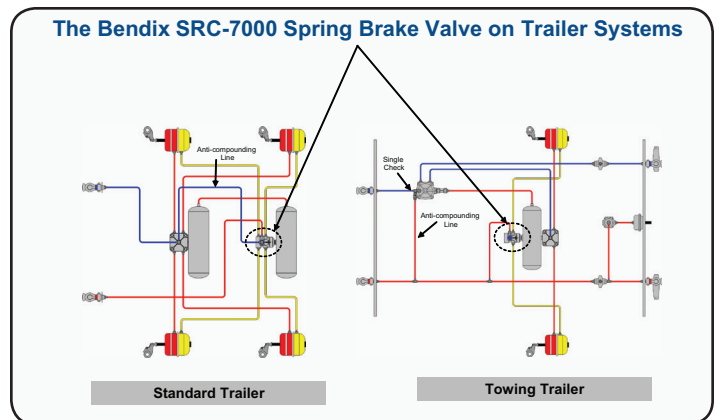

The Bendix SRC-7000 spring brake valve gives you a faster start compared to other systems available today.

Get Superior Durability and Reliable Performance at an Even More Affordable Price

The Bendix SRC-7000 spring brake valve offers you:

- Low cost—an economical alternative to our Bendix® SR-5™ valve, with the same Bendix durability and performance.
- Corrosion resistance—the SRC-7000 valve is constructed from engineering-grade plastic composite material tested for extended service life under the harshest conditions.
- Combats contamination—our design features oversized internal ports and seals specifically to perform through more contaminants than any other valve on the market.
- Simple design—the swivel mounting tank fitting prevents over-torquing and possible damage during installation.
- Ease of installation—for retrofit of competitive valves.

Your air brake system is not the place to cut corners. Rely on precision-engineered, quality-built Bendix Trailer Spring Brake Valves for proven performance every time.
